| Precipitation probability | | | | | |
| <05% | <05% | 50% | 70% | 50% | 30% |

**Forecast for Sunday 25 Feb 2024**

**Weather:** Dry to start with early patchy mist or fog which slowly lifting and clearing during the morning, perhaps to give some brief brighter spells. However, cloud thickening with outbreaks of rain or sleet by the afternoon, falling as snow above around 600m. This may become persistent and heavy for a few hours, especially in the south before becoming dry during the evening. Becoming windy, especially so by the evening with a risk of upland gales.

**Chance of cloud-free hill tops above 600m:** 60% becoming 20% by early afternoon.

**Low cloud and visibility:** Areas of low cloud and fog in the valleys will slowly lift up the slopes during the morning. Persistent low cloud developing above 600m by early afternoon with fog and sleet or snow making navigation very difficult on the tops.
